Social Media: The Commandments

Social media is generally refers to the facebook, whatsapp, youtube and where ever you write or post on the net. Now-a-days it is the whatsapp. It works on your mobile phone, you need a number and then you can post text, pictures, video, posts, you have and this is how it works. The plus points are, that you are able to communicate instantly, I can talk or leave a voice message for my Capuchin, or for the tailor. I have a heated argument with a friend and so on. But it has a other side which I have experienced; it gives rise a lot of anxiety. There are groups which are made, there at present I have or am a member of 'Homer' and also that of retired officers of my old regiment. It has got the very person who created the group is known as the admin. What happens in a group is that, we tend to act or behave in a manner which is either natural or artificial. You post something or put it other way I see a post. It is a most common - political oriented post, almost always created by a politically motivated group or person. If I receive it in my whatsapp from a friend, I will answer it back, then it is no problem. You can even simply send a thumbs up, which means that you have approved it or an angry face. Then it gives you the response in a argument which is no good or it can lead to further argument and so on. Usually you have peace of mind as well. You then think, your brain gets irritated, you want to answer back and the space is limited then you get even more irritated. One thing that I have concluded, that you posts reveal a lot about yourself. In a short time, your personality is exposed and that is one good thing. I want to protect my inner thought, although one can debate on why one wants to hide it, one nothing about, the learn being that the time on social media is too short and in case one should always reply after a lapse of few hours, you only word counts and then you reply instantly you at times lose your pedestal and that gives one restless night.

Sunday, should be 18th May, 2020

Now, I don't head the watch. Ashes return VA.

A real cloudy day, heavy overcast, and I am sitting alone on the Neal bench. Just had the coffee. Today being Sunday and this day that the people had been walking around. The cornel dapples rare of the birds. I saw a Henslow's family walking, the man, his wife, a grown up daughter and a son. They are wearing their Henslow's dress, the woman having a white skull cap and the man wearing a hat. They did not come close but they are very interesting people. I wonder what goes in their mind, how they cling on to their ideology and faith. Why live a simple life which to my mind must be bright for the new Generation to remain so close from the temptation of today's world life. But they are a reality. Then a woman with her toddler son who was making a bicycle pass by; boy was unable to climb up the ascent so they moved the other way. Now I can see an old couple with a dog. My house is located in a manner that I can see the people coming and they can see me at the last moment. There is a track on my right and then there is a track on my left and below. While sitting here I do wonder about the North West and the Raper's valley, as later the Taliban must have laid the ambush, he

All around here is peace, and peace is an abstract value that I can say peace although in my own mind there are so many thoughts swirling about and I try to let my mind be idle but it is difficult, even this sitting is an exercise on my mind which I want to terminate so that I can just share at the trees, leaves, earth, the sound of nature

The voice of people, and as I stated earlier, the women voices are always predominant in the air. Amidst this serenity, I am all of a sudden become aware of a bird or a squirrel or a humming bird. This is the fear in me that does not allow me to have an interval of peace for a long duration.

1965 War;

The September 1965 war between Pakistan and India is shrouded with multiple narratives, a few from Pakistan's perspective. Pakistan's narrative on fought in school text books revised around the war, that India attacked Pakistan without any formal warning. It is partially and legally a correct statement India did attacked without giving any formal warning; how much of Pakistan to accept and expect such formalities from an enemy. This narrative lacks certain facts and as such it puts the entire effort in the war as defensive. Pakistan as a nation needs narrative to assert itself rather than being apologetic in nature on the issue of war.

Fact is that Pakistan missed a Golden opportunity to not only humiliate its enemy India but also to wrest the Kashmir from India. First in 1962, when India was busy in war with China and second in September 1965, when Pakistan should have attacked the India, rather than being waiting to be attacked.

Even during the conduct of war, the performance was much below expectations, even experienced division should have advanced at least 75 to 100 miles inside Punjab; if not hundred miles. That was the standard distance which a German division would have advanced.

Gul Khan Wajir was born in Miranahad and when the war on Peshawar started he was eleven years old and studying in the Maulvi Siraj's madrasah near the Tachi Fort. Gul had three younger sisters and his father worked as driver in Karachi, coming occasionally once a month and staying for few nights in the home. He always look forward to his father's visit as he would bring some thing for him. Last time he came, he brought a cottered ball for him, dolls for his sisters too.

Madrasah was his refuge as he would spend the day from Fajr till Ashe there, reciting the Koran, learning prayers and hoping one day he will lead the prayers.

He was simple in many ways, but to him it was complicated as he had no clue as what is going on in the rest of the country. Maulvi Shalib dary gave them a lecture on the atrocities being committed in to the Muslim brother by the American in the Afghanistan. He was sad and also angry with the Americans.

Wajir while lying in his cot, in the courtyard along with his sisters and mother would often look at the sky as it was incredible. Mother, mother what is that, he exclaimed. Mother was busy in her own thoughts about Farhad, her husband and Wajir's father. What the matter with you, cannot you asleep without waking them; This is the light of an angel, she replied back in order to end the conversation then and there, other wise Wajir can keep on asking questions till dawn.

In our Society, the major consideration is the
'profit & loss' whether in business or in social
bonding in the major consideration, it is the
'Realist View' as opposed to the 'Idealist View'
in which morality plays an decisive role. Both
are correct approaches in their own. To think of
the benefit in a relationship to me is not a
morally correct thing but then it is almost
natural instinct. The friendships or relations
develop in early years to a great extent. We
grow from this niche but as the life progresses
this becomes a major factor: What will it
benefit me? or what are the losses inherent
in it? Not must that it has to be a
mathematical figure, sometimes the social loss
of face is very important.
In every this consideration are quite important and
these are quite different from the usual perspective,
an officer can give you a great room, just for
the official which, accommodation for the troops and
so on.

Banking system of Pakistan 1984-2020

I first opened my bank account in 1984 as a cadet. While being a cadet, I opened an account in UBL. It took just couple of minutes without any ID card or anything. When I arrived in Sargodha, I had to open a new account in HBL for my pay at Kachery Road. Later I ran pooled to Karachi and opened a new account, then another one at Peshawar and later at Multan, Rawalpindi, Lahore, Chitral and so on. In between UBL, HBL, Atari, M. Jalal, and Eten Bank of Scotland & Lahore and at Glasgow. I had my first credit card from Chartered Standard in 1998. UBL also remained an active bank, I am still getting my pension in them.

Banking at present is as unprofessional as it was in yesterday's years. Now, the issue is internet banking, paying for library subscriptions on line, it is still not practicable to pay for newspaper archives on line.

It was not unprofessional in the past, at that time everything was manual, thus manager was all the same important. He would look after your account, inform you about your cheques, inform you overdrafts and inform you all about it.

Now it is digital, it has its own advantages, the major being that you get a token for being in number thus the past practice of being entertained by the manager for getting your money out of turn.

7th October 2019

Army Air Defence as the name itself directs that. It is the air defence of army and not necessarily that of other three services or for that matter. Names in army and in military are often confusing and does not lead to the organisation as depicted. Army Air Defence, three decades ago was known as Anti-Aircraft Artillery a name it got in 1914 when aircraft were first employed at strategic level.

In 1989, Pakistan Army decided to raise a new corps 'Army Air Defence' thus converting the A.A. Art. In the first look no financial loss was incurred to the Ministry of Defence in this transition; any case finances are seldom decreased when army principally decides to act.

What is then the difference between AA and AD; in simple words, not much. However it is the mind set that differs, AD is now taken as a separate Corps with pre-ordained tasks. It is difficult to write down as to what are the tasks. Is it destruction of Enemy air force? answer is no as it is the role of own air force. Is it to safeguard own headquarters, bridges, fuel dumps and so on; answer is partially yes. AD cannot ensure that it can destroy every enemy aircraft or the assets will remain intact.

The nature of war is as such that no amount of weapon can ensure safety of vulnerable area. Yet it imposes caution on the aircraft, it even mathematically upsets the attackers calculations of safety.

There are other means of ensuring safety as well but a combination of missiles and Guns seems to be a preferred combination. Don Carlos The Spanish
Kheuda. K

General Musharoff was popular in the army, as a
chief and later when he took over the reigns of the
country. For that matter every army chief is popular. However
in case of Musharoff the very fact that he was a commander
added the requisite flair, which young officers prefer.
Other than that Musharoff still remains by temperament
a Guerrilla; unpredictable.

Only time I saw him there was in Guzmanalco in
Jan 2000, before the 9/11. The A.B. Arana Hall in Arachin
School was the venue and responsibility was given to
the 105 Field Artillery or it was 115, I am not very sure.

I was there in the School as Instructor thus free to
boam around, I entered the hall on the eve of his arrival
and address. My mind raced through history and I thought
of assassinations that have been carried out, the array
of novels that I have read of Frederick Forsyth and felt
a person who has come from part. I debated myself
and saw a character from a novel. I knew that if
you want to assassinate the president, you can do
it by planting explosives under his seat, poisoning his
water bottle; beyond these two no other idea came
into my mind other than to be the one to shoot him
but this was suicidal thus I gave up on the same
but in couple of hours I exercised my mind.

Why this feeling? well no difficult answer other
than that when you debate yourself on moral issues
in such history is the logic that such ideas
are bound to occur.

Musharoff came next day and I observed him
closely. His hair were dyed and he was not
pulling up any beret; he was highly conscious
of his hair and style. A well-dressed
at that age, rank and position.

on the evening of the 1st of the new year 1979, I had to attend the marriage party or junction of my friend Tahir Farooq's sister at Lahore. Going to Lahore from Gujranwala could not be an event by itself. A coach was plying between the Cantt and Lahore, it was erratic and sporadic in nature. I reached Lahore and managed to be at the wedding hall in time. Met Mr. Saeed, he was present with his wife and a new born child. He was the old man among us, as he is a pure civilian. When Tahir is an officer, he is a right kind of a man. He is interesting to me as not only he is a good natured but also to me an ardent speaker, as I am interested to know how civilian survive and prosper in the country.

I vividly recall that, at the turn of the clock, I was standing at the bridge over Ravi River, it has been almost over an hour standing there, waiting for any bus or rickshaw to take me back to Gujranwala. There were few buses but all were crowded. I had ample time to think and reflect on the passage of this momentous phase in human history. I finally got a seat in a bus, I was wearing a suit, thus all the more reason to be conspicuous, about which I was conscious too. At Rahatli, I got down and walked for an hour to cover four odd miles of distance and reached the safety of the house. I thought about my own life, my future and present and realised that I have not been careful with the money, thus I must suffer now.

Now if one wanders the 31 December 1979 as the turning point, then on that particular evening, we few friends got together. Those included Major Khattak and Lt Col. Mughan 'Buddh' in the mess, had few drinks and a good joke.

On the Eve of new millennium, and there is confusion about it
 whether it is 31 December 1999 or 1 December 2000. I recall
 both days. In 1999, I was in the Army Graham School and
 arranged to pass through my Rotary's instruction course, as was
 one of I have climbed and scaled K-2. Such are my feelings.
 I was happily married with two children, a boy Sahil and
 Girl Azadeh, my wife also an army doctor major then there
 was no apparent worry. However there were some dark
 one. I would think about the current situation and recall
 it with the past. Army was in power, it came through a
 military coup and that was my issue - I would ask myself
 many a times that is it morally correct to remain
 silent on an issue which to me was incorrect. The
 reason to consider it incorrect was in the fact that
 all military coups after years are condemned as such.
 Thus by my standard it is not a good step.

Gyromala and Cantt are two different world. Cantt is
 neat, clean, organized with wide roads, Green trees on the
 boulevard. Gyromala city opposite to the Cantt in
 Every manner. I seldom visited the city.

Routine was simple, you get up in the morning, a van
 used to pick up the army doctors and we will reach the base. All
 officers had different life style, majority of wives were non working
 lady's thus their pattern was different from mine as my wife
 had to go to the office like me. I had, except my wife owned
 a blue Suzuki FX, I had an Russian jeep which was hardly working
 thus I was more into the bicycle. CD player was a new thing as
 so were the CD and computers about which I had very little
 know ledge.

Pakistan 2000 - 2020

An Empirical History

Majir (Rehman) Amin Cheema

The figure 2020 was much used in the year 2000 in putting forward a vision of what it will be after twenty years. It was similar to the phrase '1984'.

I lived through these twenty years, one quarter I was in army as an aviator, this allowed me to be present in all parts of the country and observe it from third dimension. A year and half as Ghaznavi University after retirement for pursuing a post masters degree in Washington. Next seven odd years, I was a Ph.D Scholar in National Defence University, Islamabad in International Relations and simultaneously carrying out historical compilation with Frontier Corps, Rangers and Army Aviation.

I have a family, parents, friends and as such the passage of two decades of new millennium as they affected everyday life in Pakistan is recorded. The primary aim is to preserve the history and nothing else. There are restrictions, official, moral, self imposed, archival in preserving the history. I have tried my best not to break the covenant but at places it is necessary.

In the summer of 1992 I was a liaison officer with a Chilean army/air force
Expedition Team for Broad Peak they were nine young boys and a professor
I was happy and I didn't want to take any money which especially I was
authorized and opted to be just a team member. I had the opportunity
to have time with me and that Lloyd Carrolles. In close to two months
at the Godwin Austin Glacier, starting at K-2. I wondered and
pondered over life and then decided that I must quit my present
life, go to another country, continent and start a new life and
then see what happens. I was convinced that life is pain just
as I have parents, wife and one day they will die and that
Grief will be too much for me, so let's break this life and
live a life where I have no feelings of love or attachment
then I will have no Grief. took this on my selfish back
I just got three days leave, I had in the mean time got
a visa for Spain, at war Eazy then and travelled the flight.

For next two months of winter, I travelled on foot, slept
in parks, under the railway bridges in Spain, France and
finally ended up in Salvation Army in London. What I
learned, as I had none to talk, although many people I met,
but mainly I was myself, my body and my conscience to
talk to each other. The values of life, truth, character all
I discuss with myself and realised that God has not
created me or anyone else without a purpose, we all are dear
to God, none is special to him. It is our own conduct
and above all our faith in him that matters. With this I
came back, re-joined army. Longen my crime, was awarded
a punishment and reinstated. I develop my personality
cult for my command/lie officer Lt Col Azad Khan
and once while playing with him, I realised that if he
says now to me to jump, I will do, because I
have develop a faith in him and in his sincerity.

Personality cult continued ⑤ 11 June 2020
VA 22801

The personality cult in military is different from civil. In the military, a junior or soldiers are trained and by training I mean through punishment they are inculcated that who so ever is their senior they must like him and obey him. In civil, a person is free to choose and then the people are also free to highlight the shortcomings of their preferred personalities. Anyway, in 1993, I prepared for my Staff College Entrance Examination and studied military history in depth to an extent that I spent few weeks in Burma as well.

This opened up the personality of Aung Mye Thazan, it also highlighted the fighting cult of Japanese officers and men later on in the years, I started changing my hate for Aung Mye Thazan, I found or rather judge that he is not responsible for the fall or surrender of our army in 1971 war. The army was beaten because it had been misused in position for too long to give soldiers any proper attention.

I developed a liking for Benazir, as she because of her conviction was put in Sukkur Jail for two years, I developed a liking for Zardari as I felt that it is unfair to him to be put behind the bars on the assumption and presumption of corruption, when any other person with similar charges would have been granted a bail.

In the same time, Inam Khan started his political party and I confess that despite all my principles of Good military discipline, I did write him a letter of appreciation over this.

There was nothing wrong in him to have a difference of opinion. Nawaz Sharif, well I never had any true feeling of cult for him. Then came the military coup of 1999, and from the onset, I had a matter of principle difference with the General Musharraf. Because at that particular time, I was of the opinion that military Corp is not Good for the country and moreover as an officer, he should have obeyed the orders.

Question fundamentally remain, as what makes the people like, adore, or worship another human being? In the preceding pages, I have given my personal inclination to me it is the act of people which makes me admire them. I admire one person above all and that is Reinhold Messner, the famous mountaineer, as he has shown that he is fearless, brave, just in God; then he has climbed all eight thousand mountains all alone. But does it mean I will like him to be the head of state? Well very much possible. Now, the reason, I don't like Jomson Khan is because of his words, he has been speaking ill against every other person, the decision moments were when in London he called the Sardar who was the president as traitor then a dog. So to me, the words you speak must have killed them. Political speeches are a different aspect. You look, you capability, and in the end your character matters a lot. That is why I have no good feeling for Jinnah now. He had an affair with his friend young daughter, to me it is a character failure. I have no such feeling for Iqbal or Jinnah. Ayub Khan was just another ruler, nothing special about him, but I like Iskander Mirza because, in the end he did not had any money despite being Governor General to survive in exile.

Trump is a case study, as in USA, you come to prominence through your words, your debates, and in this he is superb, outshines all others by adopting a blunt approach. His bluntness is his main weapon. Religious cult figures like Peev have a different constellation, as they or their followers are groomed to admire him from the childhood. As I was groomed to admire Jinnah and hate Gandhi. This is not a matter of logic or rationality, it is something very peculiar to a typical individual person. Now he develops a cult following.

I am the prophet.

What, how can you be the prophet
Why not, why cannot I be the prophet
Just because you said so does not mean that you are a prophet
till what it requires to be a prophet.

I am not sure, but I am sure that you require someone
to be so that you can call yourself prophet and apparently you
have nothing of that sort to be called a prophet.

You are ~~not~~ getting the point, you are for the matter
more requires any man's opinion to be called a proclaimed as
a prophet; it is the mere choice of the Lord, he may pick
anyone of his creation to be so.

All right, all right; I do understand what you want to
say, but let me say again, you are not a prophet.

By saying this, you are in fact just cementing my
prophet hood as all prophets were never accepted at once as
a prophet by the people, so why should you be an exception
but be assured I am a prophet.

All right, I, for a moment accept that you are a
prophet, what proof you have, that you are a prophet.

I have the same proof or credentials as the
previous prophets had, I don't claim to be his or her
son.

But why God has chosen you and why not
me, inquired one.

To be chosen as a prophet, you must love
God, you must feel his presence in everything
and then you will be chosen as a prophet. A
prophet is not the one who is chosen by God
but someone who has developed a faith in God.

Monday 1st June 2020 . 1935 hours
VA 22801

CARS (Motor Vehicle) in USA.

By any account USA has the highest number of cars in the world, to me it seems as if every person owns a car here. In last one decade, since I have been living here on regular basis these cars have caught my attention. Kinds are made and so are the cars, big and in every size, colour and make. From my childhood America has been famous for its cars, I do remember Salman Ansari in Cant Public school, he used to come on an Impala, extra large where as my father owned a VW Beetle then. In the movie program everywhere it were the large American cars, my stepaunty Fordson, her husband late Mr. Aziz had a Ford Falcon in 1974 which he drove from Quetta to Karachi. Then the oil embargo of 1973 and these American cars almost vanished from Pakistan. In came the Japanese Toyota, Honda, Mazda, Datsun to name. I have been following the car related issues being reported in Time and Newsweek, one day or the other.

Now coming to the present, Reena owns a Honda, she had Accord which she replaced with a new model in 2016.

I wanted to finish this yesterday but now it is Thursday and I am sitting at Akhsekhin.

Cars now in June 2020 are mostly SUV or sports utility vehicle they are the most common form, four doors, with a door in the back, Ground clearance is more than a Sedan car, but less than a jeep.

Jeep is next in line, the Jeep is a company and they have certain models, Wrangler, Sahara, etc. I have noticed lately that Jeep that they are getting popular, they are Capasini, comes in two or four doors and have a much greater wheel clearance.

Then are the standard cars, as I mentioned Honda and Toyota and Kia, Mazda, so on.

in America this is that they are almost as European cars, to the most
quality other than some of the very best ones see a French or British
car. Fiat is here in a small model, so in occasional Jaguar or Land Rover
or Range Rover but yet to see a French car. American is best because
Kia has made a name and it is as common as any other Japanese car.

Car model reflects the personality of the people, now in a
data case, in this VA 2287 area, Beach Grove, Sky Lake, kind Edward.
Cris drive, Westmoreland area, I see car parks outside of
all makes and models, then at Walmart, Valley Mall and so on.

Japanese models like Toyota, Honda, and Nissan are most owned
by expatriates whether from India, Pakistan, Arab countries, and many
Latinos, these models are the preferred models they are reliable.

Economical and that's it.

In my residential area, my next door neighbor a Kurd
owns a Honda CRV, his son also owns a Honda. Kema owns a Honda
Joseph Shell an American just across the road owns a Chevrolet Trail
and also a Dodge car, three Korean women and one Indian woman
all own Japanese cars, one American family owns two black Fords
one each by husband and wife. Next to my next door neighbor the
Shrakis own four cars, two of them are Japanese and two American.

18th day of June 1864
Dear Sir

I have the honor to acknowledge the receipt of your letter of the 15th inst. in relation to the matter of the 1st of June 1864. I have the honor to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Yours, &c.

I have the honor to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Yours, &c.

I am, Sir, very respectfully,
Yours, &c.

The number of people who have been in the country in the last few years has been very large. It is estimated that there are now about 100,000 people in the country. This is a very large number for a country of this size. The population is growing very fast. This is due to many reasons. One reason is that there are many people who are coming to the country from other countries. Another reason is that there are many people who are having children. This is also a very fast rate of growth. The government is trying to control the population. They are doing this by giving people who have many children a lot of money. This is to encourage them to have fewer children. The government is also trying to control the population by giving people who have many children a lot of money. This is to encourage them to have fewer children. The government is also trying to control the population by giving people who have many children a lot of money. This is to encourage them to have fewer children.

The first of the two papers is a letter from the author to the
 editor of the "New York Times" dated 1888. It is a very
 interesting letter, and contains many valuable facts and
 figures. The second paper is a report of the author's
 travels in the West, and is also very interesting. It
 contains many facts and figures, and is well written.

A NEW SYSTEM OF THE MATHS

Handwritten text in the first paragraph, starting with 'I have been thinking...' and discussing mathematical concepts.

Handwritten text in the second paragraph, continuing the discussion on mathematical principles.

Handwritten text in the third paragraph, further elaborating on the mathematical system.

Handwritten text in the fourth paragraph, concluding the section or page.

I have been thinking of you very much lately, and wondering how you are getting on. I hope you are well and happy. I have been very busy lately, but I have managed to find some time to write to you. I have been thinking of you very much lately, and wondering how you are getting on. I hope you are well and happy. I have been very busy lately, but I have managed to find some time to write to you.

Take a look at the last century, we have Lenin, Hitler, Mao
Stalin, Ghandi to name a few and all these are remembered
or various names during their life they were treated differently
and after death differently. Since in the fall of them who
were as Confederates. The Guerra is another Example of
a man who a his life was different and in his death different
in the back more in history one can talk of Jesus also
in this category. Then there is no verdict which is all
encompassing for the man I personally don't like Jewish
and it is not from the beginning but only later in my
life I develop a different opinion because I don't consider
his act of escaping with his friends enough as a
good act. There is another character Jesus hate him because
he persecuted them to me I still have a "good" view
for his purity as a leader and his lovely communication.

After coming to America for another reason I/O he has
a romantic man a rich man leaving everything to
fight against the Communist and then to change a new
unparalleled negro male and nothing left right in the
house as act of great education. Now I see Jesus
as a person that he may represent more better than one
has to great to the human in the criteria of justice
being killed and being in a danger by American. I don't
at all of this which he achieved because of struggle
and find it to be not.

Abraham Lincoln after 1861 was regarded as a hero
as always and because he took on the big war and changed
the freedom fight for the blacks and unprivileged. You
are always disappointed if you know that he was very
modest in terms of would not have affected the country but
Lincoln had to fight to the end and not as an easy way
because it is hard not a "free man" but hard to. Jesus
and Jesus remained through the most cruel that
though the world and asked opponents to do the people
because the world in the past Jesus' church was
accepted and more of spirit in the world.

I have a number of letters from the people who are
 writing to me. I have been very busy lately, and I
 have not had time to write to you. I am sorry to
 hear that you are not well. I hope you will
 get better soon. I am writing to you now, and
 I hope you will be able to read it. I am
 very much interested in you, and I hope you
 will be able to tell me about your life. I
 am very much interested in you, and I hope
 you will be able to tell me about your life.

The first thing I noticed when I stepped out of the car was the cold. It was a sharp contrast to the warm blanket of the car. I shivered slightly, but then I remembered that I was in the city, and the cold was just another part of the experience. I took a deep breath and walked towards the entrance of the building. The door was open, and I saw a sign that said "Welcome to the City". I smiled and walked in. The interior was warm and inviting, with a large fireplace and a comfortable sofa. I sat down and looked at the clock. It was 10:00 AM. I had time to spare. I decided to go for a walk in the park. The air was crisp, and the leaves were falling. It was a beautiful sight. I walked for an hour and then came back to the building. I had a good workout. I was tired, but I felt good. I took a shower and then went to bed. I was exhausted, but I was happy. I had a great first experience in the city.

I have been thinking of you
 and your family very much
 and hope you are all well
 and happy as usual

Pittsburgh, Pa.

Amelia and I are taking seven minutes' rest every on a horse
in the afternoon. The horse was sent to the very best of
the things that I could find. I found a perfectly perfect horse
of a perfect size, and of a perfect color. The horse was
perfect in every way, and I was very much pleased with it.

I am very glad
to hear from you again and hope
you are well and happy as usual.
I have been thinking of you
very much lately.

a Jose family who only recently lost his "Gail" kind of
'three brothers' he has. In wife and a small daughter. on my
left as I walk down, the first house has two German cars
and a white aranger jeep, then the house of bearded man
and his wife, both have two small daughters and are white,
the last house, I have never seen them. At the end is a
big vacant commercial lot and across the street is a big
community health service clinic. we take a turn with the
foot path, discuss the each and every house, their lawn, plants
trees, dog, goats and so on. Usually we come across other
couples walking and just a wave of hand and hello. I normally
don't talk and it is Reina who responds. Due to Covid
we get down from the footpath, now what will happen
if we don't do, some time the other couple also get down
but so far no such issue of any ego here.

outside it is bit of drizzle, kind of weather which
compels you to go out for a jog. I have not introduced our
immediate neighbour Samira, an Arab family with one adult
one teenage and one kid boy, husband works as an interpreter
in Iraq, he is a Kurd. Samira, if I have to pick in a crowd
I think I won't be able to do so as I have seen her
few times, yet I cannot recognise her, she drives a Honda car
now when we walk uphill, the houses on our left, they
are few in number and less, one all are Arabs, the sole odd
house is an American family who owns two JEEPs, one dog
and have two teenage daughters. The houses on the right. They
are few in number, first is occupied by an Arab who is divorced
now, then an American family who owns two dogs including
one Greyhound, then an Indian lady with a grown up son
and finally Joseph Shell and his wife Lorie; an American.
ex-military, he has a grown up son Andrew living with him
and his other son is also living in same city and daughter
has recently moved from Canada to Washington.

USA vs Bhagat Singh Third Case, 261 U.S. 204 (1923)

An Evening in Sky/Lark Continued - 10th June 2020

Now it is 1902 hours. The candle dinner has ended as dramatically as it started, now as it begins outside with sun rays falling on the street, everything is now washed, although here I have yet to see any dust. Before the rain break I was highlighting the upstairs walk on the corner street, don't get confused, this square then have their street names.

Coming over to the divorced Arab, two years ago his two young daughters who were school going would walk every morning at around 0700 to board the school bus, the bus stop was just at the corner of my lot. I could see them every morning while making tea through the window in the kitchen and I noticed that one of them would smoke a cigarette before the arrival of the bus and the other would remain on lookout. Nothing serious but it was just a scene. Now, Reena tells me that they have divorced and the wife and girls have left. I have seen the Arab many a time smoking cigarette while sitting on the steps of his house. He also owns a truck which is usually parked in his driveway, his house is the only one without a porch.

Next to him are the white couple with a Greyhound and a small dog. I have come across them two times and generally found them aloof. Women is quite dominating in personality she is "any case" taller than her husband. Throughout the summer I have seen her in shorts. Opposite to divorced Arab the house is under construction, almost complete and next to it is halfway through, both are owned by Kurds.

The third house on the left and next to it are owned by Kurds too. In the first one is a family, with three kids two girls and a boy. They are typical in nature, at evening I or we when pass them, the kids are either playing basketball, or they have a moveable pile of bicycles. The

America in the past Floyd

If I see at 1500 hours while sitting here at the arboretum, nothing has changed in last one month, the impact of Covid is all too visible on everyone a wearing mask, Ururangi is close but to talk of Floyd or Black Lives Matter, there is no visible impact here in this small town. On the other hand when I scan or scroll through the net, there is a huge impact of Floyd killing. There are acts of vandalism in which the Confederate General's statues are being defaced, beheaded and there are voices not from ordinary citizens but at the highest level to change the name of military commanders; the Confederates, all traces of history associated with Confederacy to be eliminated. My opinion is that, the very fact that America was founded on the basis of a nation or country for the white people only, it is in their declaration of Independence that only free white men will be granted the citizenship, there is no mention of any other race.

Thus if history is to be reconstructed then all such acts have to be altered, the Great names like George Washington also have to be put on trial and if that happens then the name of Capital has to be changed, an altogether new form of history then to be written and presented. There is nothing wrong with that with the passage of time, history is re-written, after all history is nothing but an interpretation of the past and if a new version is to be written then let it be.

This issue of history that will not be confined to USA only, all other white race or nations have to be put on trial, Great Britain, France, Portugal, Spain Germany will be put on a trial

What need we have for it and what is it for? The
answer, none to the world, only in the eyes of the
the audience. The morality of the film has to be assessed
as it is seen only. Story of Jack and his son and their
and how much more should be put in it. It is
one of the most dramatic. It was produced in a
form in which all angels are white. Why should it be
not white? It has to go on and on. It is done
for the limited knowledge of our race. Especially that of
the African. It is not a story of the past and slavery.
There is all religious and other. It is to show to the world
the kind of world we are creating. What about
the man killing of Alexander down to our time
the civil wars in Africa and Asia.

Unfortunately when we look, we find that at a
clash of races, which we called clash of civilizations
our history. Which is any case is not that long. A million
ten thousand years ago in which we have knowledge
in form of books and monuments dates back to only 500 years.
The Pyramids, Old Testament, Old Testament, Roman Empire.
The Greeks, the Persians, Chinese and Indian valley are
the only civilizations about whom we have a kind of
working knowledge.

Subjugation was not only in form of war, but it was
also in form of sex. The male and female. It was there
on the basis of caste and beliefs. Then of the history
has to be written then all such aspects have to be
covered. However for the time being it is only the
aspect and that is black, the most obvious and it is
associated with slavery and it was more prominent
in USA than in any other country.

My scriptures, no matter where they are, have one very
useful aspect, they practically shut off our questions, we
cannot ask the question as there is more to answer than
only God can answer for what he has created and made
you, here I am also saying God is a masculine being. The
end result of all this is that there are no definite
answers, at all in our mind. I, who was born in
Pakistan, believe that K. 2 and surrounding areas are the
birth place of human, and similar Jeddah do exist in
the mind of those who live close to Himalayas. I cannot
have this feeling for Virginia, that human race developed
from here and moved about Great Plains.

As the man progresses, again I am using the Latin man and
not woman, it seems so natural to refer to man because
this is how it has been engrained into me and that is for
a great in the matter of our education and our books.

For my own, I have left this query as where
human were sent, how many, and in what form or size
a colour. I have to proceed I will come up with a
narrative but as my aim is not to satisfy my own
inquisitiveness and to share this with all those who are
interested. I have lot of similarity in the black man or
woman of certain race, to be very similar to Gherkins, now
this can be taken as a compliment or can be taken as
a racial slur. This interpretation is wholly up to the
individuals, and this is how, may in the past and in
the present play. My can a fight you with them.
In my experience I am sure by virtue of experience, that
even this narrative can agitate many to the point
that they can very readily take my life, just
to please the gods. As I am only God that
has created us all.

'Cats Diary'

①

I was appointed army chief on the first day of September 2018 and assumed the command on 20th November same year by the Prime Minister Imran Khan. I was the Senior most General and on such a controversy arisen. It looks very simple indeed but when I look back to the day of 1982, when I had gone to army selection centre at Karachi, I did not had the bus fare in my pocket and had to request the photo shop to get my documents scanned. Now I have wealth much beyond what I can even calculate, my personal staff does it for me. From the day when I was selected for the army at the selection centre at Gograwala, I had the dream of becoming the army chief, although within weeks of my entry academy I was more concerned about getting to the next town. My almost rejection in third term due to smoking has been was overruled by my platoon commander Major M/Am. I lost the map case in my final term, my bills were over the limit, my restrictions were more than other cadets. Then I was lucky to be passed out in the second bracket.

My regiment was not of my choice and I cried openly by when it was announced in the Ingalls hall. I reported at Sardar Khan on 20th September 1984 and had to traverse in a truck when you will over two hours, because I did not bothered to write a letter to the Commanding Officer. In my case my first CO did not interested with me for his next three months before he was posted out. My next Commanding Officer Lt Col Sarwar & his one who brought a change in me for good as he convinced later that his son also named as me, thus he was treating me more like a child. I did not do well in courses, but perhaps the only good thing is we are that I look regiment in my home, I tell it have with it, I love the things reported there and that with are all. I tell it have with a girl, she was a nurse & the air force and later I could not pursue her as I

Jell in love with another and another and there heart broken
feelings were finally smoothed when I met a lady doctor. I
volunteered for Graham and this is where my luck took a
turn. I was sitting there at the Haji post, when the Brigadier
Commander asked for a volunteer to be heli-slung on the
plane, I was selected and Major Reuel Selford got me slung
in his same helicopter and I was dropped at the Chumik Post
where for next three days I was able to single handedly
thwart an Indian attack and then I was decorated with
a medal. I am a Javoor asked to be allowed to join the
Special Services Group and was able to not only get the
long but also the Golden dagger too now I am a Good
Officer. As luck would have it, I am there at Panchkora
while the Russians were there. Luckily my parent regiment
and battery was there too one fine evening, while the battery
Commander Major Mung and Captain Soni Khan were at the
Russian Officer mess, two Sea ship helicopters appeared and
I without hesitation ordered the battery to open fire and
also aimed one of the Sea ship with my slings, helicopter
was hit and I was decorated again. This time as a Javoor
I requested to be allowed to join Army Aviation, about the
then Army Chief General Jai was kind to allow and I came
back to Gurgaon. Only the Staff Staff Officer at the
history of army to put on both wings, SSF and Army Aviation

I got married with my lady doctor, although in Karachi
I met my school days love too, she was leaving for USA
and I accepted it as a just accomplish. Amidst all this
I, through lot of request got the chance to be a desert
Officer with a Cholan Mountain Expedition, it was meant
for my Father, but I wanted to go in the mountain then
very reluctantly my Commanding Officer let him allowed
me to do so.

11 Dec 2020, VA 2280

(2)

Coms Diary Coms

The two months at the base camp of K-2 was a Jabbon Experience. I was its mediator, before coming to the mountain, I had taken a month leave to go to Thailand, courtesy to Captain Young who insisted it was that, it was good to go out, Captain Mayhem Bradley who facilitated me. In Thailand, I met a German Girl Ingrid and she introduced me on how to break Ganga and India to the Pink Floyd. Anyway Coms to the mountain, for no reason. I also decided to climb with the team and I cannot explain but I was able to reach the summit of Annapurna and better days was able to climb K-2 as well. A great battle experience but I think it was more due to the fact that I had lost the love for life and was generally asking or praying the God to test me. When I come back, I had decided to take an abrupt decision, to leave everything in life and to go to other country and start a new life, a place where none knows me and I know or love none. End result was that I deserted, and for next three months wandered in Spain, France and England all alone, talking to none, but to myself. I slept in the battle fields and finally ended up in Salvation Army in London. Then I decided to come back and face the music. I had found the peace within me, I was now totally in peace with myself.

My Commanding Officer at Peshawar Lt Col Azad Mirza, for reasons better known to him, saved me from certain imprisonment he practically begged this Corps Commande Lt Gen Ayaz to be lenient and I was left off the hook. That was the turning point and it happened in 1983. Now I had no hope of any promotion thus I was able to give my best to the army.

The very first Barani at Mulla, I as a Squadron Officer wore helmet and weapon because now I loved it and not because I was ordered. Corps Commande Lt Gen Kazamat was personally astonished to see our camp and praised me.

I appeared in the Staff College entrance Examination and to study the military strategy went on a leave to Burma; on the first steps of Major John Masters. I travelled as a Chindit, an officer of British Army and travelled to Mandalay Golden Palace. I was not selected in the Staff College in the first attempt but made it in the first attempt. At Staff College I did well, because now I had the advantage of all these years of hardening. I was posted as a brigade major of an Infantry brigade at Sanchi. Kargil plan was my brain child, I put up the plan to the brigade commander and I took the first party by myself to occupy the heights.

War was good and I was promoted during the war and was taken by the then army chief on his personal staff as well. I commanded a SSG battalion and an aviation squadron at the Skardu before I was sent to the war college. After the war college I served as personal staff of the president and the army chief and this gave me an insight into the politics and the military.

I realised that all are patriots, there is none who can be termed as traitor; it is the perception that only 'I' am the Saviour which is the dangerous fraud. I was the brigade commander in Rawalpindi when Benazir Bhutto was shot dead. The country plunged into a chaos and anarchy but luckily Senate presided and Election were held and Sardari came into power; I was then commander of the Infantry brigade in Waziristan, later I commanded the newly formed Special Task Force to fight the insurgency. I was promoted a two star General and initially entrusted with Northern Areas, then I commanded an Infantry division at Miranshah, and it was in Torkham that I got the news that I am promoted as a three star.

12th June 2020

Arborelin

American Summer

Today is 12th June 2020 and 1430 hours and I am sitting in the arborelin, a warm day. Officially it is still Spring time and Summer will start June 22nd June; The longest day of the year. My flight back home was scheduled on that day. It was initially in March, then May, then June and now I have no idea when will it take place, all due to Covid effects. I have been living here in arborelin when it was sealed and I could see the entire arborelin in all trees were naked. It was a great exercise and a mental agony then as I could not find a secluded place to urinate. But now it is a thick jungle where even few yards ahead is shrouded with tree leaves and I can urinate with much ease, although I still keep a good watch on urinating in public is a grave offense. Birds chirp all the time and there is a melody in them, I am sure they are talking to each other the way we send telegraphic messages.

People do walk here, more on Saturday and Sunday even in this Covid era, what kind of people are they. Well right now I can listen to the voice of a little girl. Old couples come here to walk and invariably all have dogs with them, the dogs are generally of small size. Seldom I have seen a large size dog. Women alone walks and jog and they all wear shorts and majority have mobile phone with headphones.

A kind of acquaintance develops here, I mostly sit on a bench to write and we just make small gesture of hand to each other just to acknowledge other's existence. Young couples also are here. When I look around I see squirrels moving around, few days back I saw an injured squirrel for the first time in my life.

Saturday, 13th June 2020, 1300 hrs
122887

The budget was presented yesterday in London and I followed it on the net, the details are given by the news and also the speech of Minister of Industries Mr. Hammond. For this reason that Finance Minister is not part of the assembly. This is an irony by itself that budget is prepared by a person who is not a member of Scottish national assembly. This is more commonly referred to as a budget in it in the wake of Covid. Nothing was expected, rather I expected a much more radical budget with lot of Taxes, but there are no such ideas in it that is the Good point. As with the repatriation of the Corona, one thing is obvious, and not only for Pakistan but for the entire world that states were spending lot of money on the defence, and defence for them is mainly an External threat from other country to destabilise one's nation, that is why money to buy and keep aircraft, ships, formations of men, weapons and so on. Even the superpower like America and Britain found themselves with their pants down in the face of the pandemic. There is a shortage of ventilators, hospitals and so on. This pandemic is not a temporary thing, it is apparent, that it will stay with us for months and years to come. Even if I take all the reports as exaggerated, still the psychological impact on the people is devastating in every sense. Depression and other related aspects are there, social distancing is here for years to come, people will keep on going to the hospitals, always suspecting that they are suffering from Covid.

Thus rationally you expect that my country now will be focussing extensively on this issue, at least for the year in coming. This is how one expects from a

Now see and analyse the current budget in this spectrum. Government has increased the health budget by double. So this is one way to look, but then the other aspect is how much is this double means, well this double means only 5% (one point five) of the money set aside for the defence. absolutely a ridiculous approach, it should have been logically and rationally the other way around. Money set aside for health is not even .2 percent of the entire budget. our biggest enemy is this virus and not India, China, Afghanistan or Iran or any other country but a virus. To combat virus we need medicines, hospitals, ventilators, testing institutions like medical universities, colleges we need doctors, nurses, sanitary workers, ambulances. We need better sanitation, we need play grounds, clean water, protective gear. We cannot fight virus with our tanks or ammunition. But this is the reality, we will be spending money on a hypothetical scenario against Fox/and. One fails to understand as why military commanders themselves have not realised that if this pandemic spreads then troops are good for nothing. If troops families die of this virus, then they will loose heart; who is going to run this country or for that matter who will be attacking us if our towns, villages and cities are littered with dead bodies.

You cannot create hospitals in a day, neither the doctors, you have to invest now, and this budget is a slap on the face of humanity by the military. This inertia will remain in force.

14 June 2020
VA 22807

Economics

Everything revolves around Economics, this is how it seems, and I am part of it. I think about Smartphone I want to buy, the watch I want to wear, the shoes and so on. All this needs money and around money this world is going around.

A country, now let me be specific Pakistan in my homeland and as such I think about, how life can be made better. and this word better is also abstract in nature. I own a house, which I did not construct, I own agricultural land because it bequeathed down to me. I am married and have two grown up children, one is doctor and other daughter is studying. My medical is free as I am a retired army officer. I get pension, my wife she gets pension, she has also inherited wealth. So how can I, or why should I think about money, well, I am not working and this is a proof that I am not interested in making money.

In Pakistan, when children are born and they are born to human. They grow up, now the nature has played its role, some are born rich, some are handicapped because they are born in a low caste, there are human barriers and none can change it. A child born in a Sayed family has certain advantage than a child born in a mirasi caste. Almost fifty years ago when I was born, my father was a worker but belonged to a Good Social Caste, again the law of nature. Now when I, if I have to compare all my childhood friends, I would say that nature was and is fair to all of us, it has treated us equal by giving us fair share of happiness and Grief.

I spend my childhood without my mother, so can she live in a poor area with a car and Joseph Ford who can match my friend Zehid, who was living in the village with his mother; it is all how you interpret it.

State then has to provide equal opportunities to all its citizens and in our case, it is education or access to the school, college and university as all our future economic growth depends on a great deal on having education. Myself and many of my friends we all attended village school, but some did not pursue it and others did. Just in the second, the one who left school early is now the richest man in the village because he went to Dubai and worked. Thus education itself is no guarantee that you will be the richest, of such men by itself is his sole criterion for a successful life.

State's duty is to provide free health, it may come as a surprise that even the richest country like USA does not provide it free to all. State also has to construct roads, and many other such things, thus state employs people; and it employs those who have educational degrees to manage all this and pays them in return. Now state needs money for all this and this it acquires by tax. You pay tax to use the road, you pay money to get education, you pay tax out of your wealth so that state can make payment to the officials. Above everything state needs money, massive money to protect you from external enemy by keeping a military and also a police so that no one takes your money from you.

In all these, all over the world, it is the military which consumes the biggest chunk of wealth. Many have died because they could not afford a good health system but still they paid so that aircraft could fly. So if a country can control its expenses on military, it can provide a better life for its citizens.

The concept of defence, insecurity, external threats is so much ingrained in our present political system that it is futile to put forward any words on its pacification, the viable and practical approach is how to minimize it. How much is enough for the defence, education, health services, welfare, salaries is an interesting debate by itself.

In Pakistan, state is spending a lot on the military, it is spending more than it is spending on anything else and can it be controlled.

14 June 2020
VA22801

How a Country works

A Country, any Country and this brings into the mind as how a country is formed, a country does not form all of a sudden, it has its roots in the past and as we go back into the history we come to a dead end. If one takes the biblical point of view of God creating Adam and Eve and then sending them to the Earth, where they produced children who killed each other and then migrated and multiplied and hence forth we have the states, nations or the country. Although all these words have their own meaning but still at times, into mind a group of people who are also called tribes having a certain territory in which they are living. The earliest tribes did have a code of conduct to follow, civil or tribal law that were inherited from their forefathers. History has many such instances, Rome was formed by the brothers and from then the grew in numbers. Britain also has a similar story and even in remote places like Brazil, a story of the brother is in its form to trace the very beginning of their history.

Let us assume that 5000 years ago, a couple walked into an area, now we have to describe this couple, are they white, black, brown or what. We also have to describe the area, is it flat, mountainous, desert, sea or what. As we ponder over it, more agitated our mind becomes, we cannot wholly describe the very initial setting or the opening scene of our narrative.

One of the best example is USA a virginia, where 500 years ago a ship lands and over a hundred people disembarked, it is like the ship of Noah. Among the people are equal number of men and women and a equal number of them are white, black, brown or for the ease we can divide them into black and white only. As these people set foot, they are human and therefore have to follow the laws of nature, which are still valid today, namely they have to eat and they have to pass on the cells in the form of their white solid waste (shit) they have to

Eat also, what they eat and how they eat & not that
mountains, lands & nature are interesting, they are
true in all, & especially of this course, every person has
to die, one way or the other, in reproduction they have
to separate, this than their live some laws of nature
rest every thing can be much used.

It is true, that God did not send just Adam and
Eve but sent two pairs of man, pair in the pair of
different colors in different parts of the Earth he created
our understandings of the present and past will be pretty
misguided, so God sent them pairs, and after a thousand
years, then pairs became hundred thousand & even more
when God sent them.

Now, tracing on each pair, this story of their development
is almost identical in the beginning, a very pair, there were
killing, murder in the state of nature. As they grew, they
migrated to the other continents, now God had created
all continents and identical but some the variation
like a nation, abundance or shortage of water, food, nature
of soil and so on. After another thousand years, then they
have multiplied and began how to produce food in churches
despite all the differences, they were still following the
laws of nature. Each one built a house in all the groups.
They adopted the customs or handed down to them by their
forefathers and remember in the beginning God gave them all
the same teaching, to be faithful to him, it is with the
time that they developed own individuality of the God

Blacks were sent in Africa, white in Europe, Brown
in Asia, Yellow in America, Tan in South America, and
red in America. This is one interpretation.

This is that God only sent one pair, one of them was
white and the other was black. It is up to us to decide we
take male as white or female as black, with the
intention, the different colors look black and
the other migration.

Sunday 1st June 1970
Asgarham

Not a word has he had recently. I came to know about
the sad demise of 183-quad. I was on a hand-picked
through the forest, and of a few things on which I have
at a time. I would not be a day without the 183-quad.
The children always loved it and I had to go to the
you have to go to and now. As I look back, the
effort of a man in his life is a character. His behaviour is his
family no impression on his children. Under him, I have
all the 183-quad. I was to see the children and now all
in the 183-quad. There is nothing one can do, it is a
of nature. You cannot fight it. You cannot resist it, all
you can hope is in the best and nothing more. As I sit
here, with my mind thinking about all the melancholy
things I have to say and yet the reality is written on the
wall. It is that like this that I have been away from
my own family because this loss is too much. I can
hear the children's voices here, sitting on a bench, so full
of happiness but who knows what is there is the
fate. Sorrow is a very much part of our life, we cannot
escape it; we have to face it and that is why we find
Sofar is the religion and is the abstract concept of
God.

Other news, again I saw it on Facebook in the death
of Miss Mursarat, she was teacher in Lawrence College
and although I studied there for a year, yet my
one and the only picture of that time 1970, is a group
picture in which Miss Mursarat is sitting in the centre
and I do have very good memories of her, very
gracious and elegant lady. I learn that she
was unmarried and lived in Abbottabad.

As a selfish human, my conclusion is that I am alive and healthy and all these items are appealing me, naturally my mind is still occupied in buying few more fountain pens, of Seiko type, heavy in weight. To buy a Seiko watch with a Canvas strap, to buy a Canvas hotdall, to buy a Good mobile phone, this is what my mind is thinking and thousands of miles away, again is thinking some thing different. This is a strange world in my ears. The sound of a man is coming who is entering a female with his tales of chivalry and humour. I cannot see both of them as there are trees in between but I can hear both of them. I would like this and so on. It is a cloudy day although it is fine yet cold.

Yesterday Reena showed me a video of a man being shot by his wife in some part of America. In the morning while coming back from the hospital I met Dr Nick, who had lost his mother in Hungary. Two days back life is not a bed of roses. Well may it be to some, or maybe it looks like this to me. From his distance and distant surroundings here. Now, come out and see the air is cold and I am wearing a winter jacket. He is under a depressing kind of environment or maybe this is how I am feeling now.

A simple is talking. While men have a beard and women have a mustache. My other hand has got a ink and I am not sure. How to use this ink has come from me. From the top of this pen. A 'Kee' has just walked over on my hand. These small animals also have a mind of their own and as one observes them more one realizes that they also think and act rationally.

The men behind the trees in constantly chattering and rustling. There are occasional giggles of a woman too.

never considered as corruption. Other method was that every soldier is given a ration money when he is on leave. Then every battery was authorized to show few troops on leave on paper and then receive this money. This money was again the fund of the battery, I remember we bought Dictionary from it. Carried our mailer and by mailerance I mean searchification of the office, and also on the official residence of the battery or regimental commanders. There were always taken as part of everyday life. I stole road sign with the help of my troops search from the public parks, wires from Electric pole, etc to be used in the regiment. Never for once it was considered as corruption rather a hallmark of a regimental spirit to me and every one. Regiment was every thing and every thing else considered after it. We officers were belied for such daring action and in turn we would get the blame for this. Plan would be made how to steal the Government property, it was always the Government property & stole & paraded.

Then I joined army machine. Things were more refined every pilot or pilotage is authorized a flying meal which included breakfast, lunch and on night flying dinner as well. The Squadron made money by false claims of these flying meals. Tickets were booked and then cancelled and money claimed from the Government. This money was again spent on his searchification, purchase of new furniture, carpets and so on. As I grew more senior, it became a common talk for every CO, to boast how he has made funds and how his predecessor spent all the funds. There are no exceptions, all General officers and they were commanding officers or will have done this. Naturally all officers would put up a leave and then get a warrant and use it to go for courses. Thus I say that I was a corrupt officer.

Corruption, Continued

My life changed after my desertion and jail and
reinstatement in army. I knew I had no chance of any promotion
and further the experience it self has brought a drastic change
in me, now I was free of peer pressure and adopted the army
law as my religion. From 1992 onwards I did not take any
personal advantage yet I still remain part of this system
and readily signed and authorized all such document, by
law, I was still indulging in corrupt means. Another common
mean of corruption was the travelling allowance, every officer
in Gurni a certain amount on Guest room charges, and then he
has to pay to his mess in which he is staying and then get
a bill from the mess, it became so common for the officers
to present fake bills that it was never taken as a mean of
corruption, I did it for times before 1992 and once after it
due to a peer pressure Army in 2010, altogether got rid of
this requirement of presenting a bill copy. Now you can
simply take the TA/DA and where you stay is your place
place as anywhere, the money is yours going into the main
details of the bills, a certificate is Generally given that
an officer is not provided with the transport or the accomodation
it was always given without any second thought. Only once
in 1997, we had a new officer Captain Harman Singh Bhatia
he has denied the mess facility and he did not signed
that certificate to another officer rather someone that the
messing officer pays the electric bill of his camp. Then
he started we thought that again Harman Singh Bhatia
was not a very honest officer.

The first of all this is that it is very easy to point
finger on the civilian officer than on army army
officers but we seldom looks into our own way of
life to make an analysis I, signed, never commended
any body of troops independently than I can write
all this, but who knows had I got the chance
I would have been no different than the others.

I have told you about the morning and evening of the Harrisonburgh but now let me tell you something about the night time. Here in the Skagask Lane it is very peace and people go to sleep quite early as they have to be early in the morning; it is absolutely different from our culture where people remain awake almost all night.

Now a days that is on 14th June 2020, the light remain till 2045 hours, then one can see all around, not many people walk about. Our near neighbour Mr Reddie has a grown up daughter and a son, but her daughter often call her friend mostly Hispanic or black and they do play music but late even then they pack up not that late. When the University was open then one could find quite a bunch of students on the weekend nights and they would play music. Still I would say they do not cross any limit in terms of excessive sound.

ALEXANDER THE GREAT

Campaigns in India Civilization 323 B.C.
As seen from present Era.

Alexander the Great's Campaigns are the very first record of military values that we possess today. Before him (330 B.C.) the present world had no European or detailed account of any Campaign; and this is more pertinent to India sub-continent. The account of Peloponnesian Wars do throw light on the wars fought in the Aegean Sea but Alexander was the first to employ a group of specialist historians to write the account of his Campaigns. The accounts are the very first of India Civilization and ages of present day Pakistan.

Can we make any sense of our present day with the help of the past.

Self wonder's watch.

Q21 Why I want to write

Because I enjoy writing

Q22 What you want to write

Anything and Every thing

Now Why? you want to write because you want to be famous

By this time I have realised that fame can come anyway and even if I want to desire it there is nothing wrong with the idea, I admit that I want to have Nobel prize for literature

So, you want to write, so can be famous and rich

Well not really, because I also realise that by mere thinking it will not happen. I want to write what I feel, about this world, because I have realised that words do have a power, it can change people

You want to change the people?

No, no in the sense, but I would like to tell them, the life I have spent, and I spend a life because I know that one day I will write all about it thus I cannot leave it like this

Then write, but write in a manner that you like and not the way it is accepted.
